

Customer Case Study: Xtreme Drilling

Business Problem

Xtreme Drilling has a fleet of valuable spare parts that are needed at any time when another part fails on a drilling rig. If there is a delay in delivering a spare, or if it is not usable, the cost and potential lost revenue to Xtreme could be significant. Xtreme needed a way to always know the inventory and location of spares, their status and readiness for immediate use. Xtreme needed a clear and efficient way to track, and make their data always ready to any operator at any location.

How Tenna Helped

Xtreme implemented Tenna's QR asset tag tracking system.

- 176 key assets, worth \$9 million are being tracked.
- Tenna's team traveled to Xtreme locations to assist with implementation and training.
- Tenna provides insight on each item, its precise location, status, and availability. For every item, Tenna records its every use, relocation and maintenance.

Results

- Reduced operational downtime compared to their old system.
- Ease and peace of mind that they are in control of all spare parts.
- Company renewed and expanded their relationship with Tenna.

About Xtreme Drilling

Xtreme Drilling Corporation is an onshore drilling rigs service provider that works with exploration and production companies around the world.

- 21 rigs located across all geographies.
- Xtreme's drilling rigs are among the industry's newest fleet, with rigs outfitted from top to bottom with technologies for today's applications.
- When the new 850XE is deployed in the fourth quarter of 2017, it is expected to be the fastest-moving, most efficient premier spec rig in the US, with drilling depth capacity in excess of 27,500 feet (8,350 meters) with 5-inch drill pipe.
- Founded 2005. Publicly traded (XDC). Headquarters in Calgary, Canada

About Tenna

Tenna uses Internet of Things (IoT) and proprietary software and hardware technology to help companies track, manage and maintain equipment and materials. We connect field crews with head offices to provide instant business insight on their complete range of assets, so that these companies can manage their entire inventory on one platform.
